INTE 3363

Assignment 3 Due: Oct 29

A. PHP Form

Using http://www.phpeasystep.com/phptu/8.html as a guide, create two PHP code files.

1. Contact.php – which is the form
2. SendContact.php – which email the contact info from the form

Prepare PHP files; upload to a new folder on webcoursepsace.com named **'assign3'**

Test your form using your email address. Once tested and complete then change the the email address to mine (robert.farmer@msvu.ca) and have your form send me a message with the subject **'INTE 3363 – Assign 3'**

B. PHP / MySQL Administration / Create Table

Using http://www.tizag.com/mysqlTutorial/mysqltables.php as a guide, create a table using PHP.

Using your 000webhost.com sub-domain.

1. Create a new MySQL Database using the suffix 'assign3' under 'Manage MySQL Database'
   a. Record the access items reported once create – copy to word and upload to your webcoursespace.com – to the folder named 'assign3'
2. Prepare the PHP code to create a table with this new database
   a. If successful you should receive message 'Table Created!'
   b. Upload your PHP code file to webcoursespace.com - to 'assign3' folder

Optional…

C. PHP / MySQL - add data to table

Using http://www.tizag.com/mysqlTutorial/mysqlinsert.php as a guide, add data table

   a. If successful you should receive message 'Data inserted!'
