INTE 3363

Assignment 4 Due: Nov 18

A. PHP/MySQL

- Using the MySQL file from the MidTerm

  create individual php / my sql code that interacts with the

  database file.

  - Display data (code attached)
  - Delete data
  - Update data
  - Select and display one record of the data
  - Create HTML or a Form that helps assist with these

    Samples place in mysql_files1 folder…

B. Dreamweaver Fluid Grid Layouts

- Create a website using Dreamweaver Fluid Grid Layouts
- You can create your own or follow the following tutorial http://www.fuelyourcreativity.com/using-fluid-grid-layouts-in-dreamweaver-cs6/

PART A

```
<?php
// Make a MySQL Connection

mysql_connect("mysql1.ehosting.ca", "3363mt", "midterm") or die(mysql_error());
echo "Connected to MySQL<br />";

mysql_select_db("userdb_21987_MidTerm") or die(mysql_error());
echo "Connected to Database";

echo "<br />";
```

PART B

```
echo "<br />";

// Get all the data from the "Oct29" table;

$result = mysql_query("SELECT * FROM Oct29") or die(mysql_error());

echo "<table>";

// keeps getting the next row until there are no more to get

while($row = mysql_fetch_array( $result )) {

echo $row['FName'] . " " . $row['LName'] . " " . $row['HairColor'];
echo "<br />";
}

mysql_close();
?>
```
