Forms

Sample form – scroll to bottom

http://www.tizag.com/phpT/examples/formex.php

An email form – two php files (the form and sendmail.php)

http://www.thesitewizard.com/archive/feedbackphp.shtml

http://www.thesitewizard.com/php/index.shtml (more from this site)

http://www.phpeasystep.com/phptu/8.html

Another email form:

Starting with a simple text email (in PHP)

Followed by a single file email form

http://www.w3schools.com/PHP/php_mail.asp

Here is single file implemented:

http://inte3363.webcoursespace.com/phptest/mailform.php

Note: it email me at msvu.ca – I expect an email from everyone (be sure to include your name.

MySQL

Ebook
